- **Author** of the Mind Matters – the emotional aspects of Integrated Iridology 2021.

Integrated Iridology® is a cohesive blend of American, Australian, and European models based on the writings of many leading authorities proven with forty years of clinical practice. Integrated Iridology® was the first Iridology system to combine the teachings of many Iridology masters, and embodies the physical, mental, and emotional aspects of signs in the eye.

Toni is Australia's leading authority on Iridology and her school, the College of IRIS, is the only one in the southern hemisphere specialising in Iridology education.

Toni's expertise has made her a popular choice as a keynote speaker at many conferences across four continents.

Toni's clinical experience practising iridology began in 1981 and continues today. Her personal research in iridology has led her to discover some unique iris signs. Information was based on clinical case studies offering new insight into the value of the iris in determining the individual health profile.

Much of the recent research in iridology concerns the emotional aspects of the physical signs. Toni continues to research these aspects of the iris. She is the author of the Integrated Iridology® range of products, which can be viewed and purchased at www.iridologyonline.com
